### **DETAILED ACTION**

Applicant's election of Group II in the reply filed on 12/29/2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The claims are being treated as compound/composition claims; therefore, the intended use of the compositions is not given patentable weight. Claims 13-34 are being examined on their merits herein.

#### ***Claim Rejections – 35 U.S.C. 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 16, 21 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. A compound is a single entity, thus it cannot be comprised of the different elements.

#### ***Claim Rejections – 35 U.S.C. 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Eugster et al. (GB 2285805).

Eugster et al. teach dicarboxylic acids with sterols, vitamin-D and vitamin-E compounds (pg. 1, Introduction). Compounds such as azelaic acid calciferyl-diester and azelaic acid cholecalciferyl-diester listed on pages 9-10, meet the limitations of claims 13-16 and 21-24). Other compounds made in the invention are listed on page 26, which include azelaic acid cholecalciferyl-diester and fumaric acid ergocalciferyl-diester (meeting the limitation of an alpha, omega dicarboxylic acid carbon chain backbone that is unsaturated in claims 17-18 and 25-26). Compounds according to Formulas I and II on page 1, meet the limitation of substitutions claimed in claims 19-20 and 27-28. The pharmaceutical compositions of this invention may be in cream form (meeting the limitation of claim 34; pg. 20, last paragraph).

Claims 13-16 and 21-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Taubert et al. (U.S. Patent 3,916,002).

Taubert et al. teach compounds that are monoesters of dicarboxylic acids and steroid alcohols that are prepared by conventional esterification procedures, mainly by reacting the dicarboxylic acid with the steroid alcohol in the presence of an esterification catalyst (Col. 4, lines 16-24; Col. 5, lines 34-47). Suitable dicarboxylic acids include azelaic acid, pimelic acid, and suberic acid (Col. 4, lines 7-15).

***Conclusion***

No claims are allowed.
